NOTA NO. 57541

1. The first part of the document is a header section containing the title "THE EFFECTS OF THE 1997 ASIAN FINANCIAL CRISIS ON THE ECONOMIC GROWTH OF THE ASEAN-4 COUNTRIES" and the author's name "Dr. J. S. H. CHAN".

2. The second part is the abstract, which states: "This paper examines the effects of the 1997 Asian financial crisis on the economic growth of the ASEAN-4 countries (Singapore, Malaysia, Thailand and Indonesia). The results show that the crisis had a significant negative impact on the economic growth of all four countries. The impact was particularly severe in Thailand and Indonesia, which experienced a sharp decline in GDP growth. Singapore and Malaysia, on the other hand, were able to maintain relatively stable growth rates during the crisis period."

3. The third part is the introduction, which discusses the background of the Asian financial crisis and its impact on the ASEAN-4 countries. It mentions that the crisis began in July 1997 with the devaluation of the Thai baht and spread to other countries in the region.

4. The fourth part is the methodology section, which describes the data sources and the econometric models used in the study. It mentions that the data was obtained from the International Monetary Fund (IMF) and the ASEAN Secretariat. The models used were the Vector Autoregression (VAR) and the Error Correction Mechanism (ECM).

5. The fifth part is the results and discussion section, which presents the findings of the study. It shows that the crisis had a significant negative impact on the economic growth of all four countries. The impact was particularly severe in Thailand and Indonesia, which experienced a sharp decline in GDP growth. Singapore and Malaysia, on the other hand, were able to maintain relatively stable growth rates during the crisis period.

6. The sixth part is the conclusion, which summarizes the main findings of the study and suggests some policy implications. It concludes that the crisis had a significant negative impact on the economic growth of the ASEAN-4 countries and that the impact was particularly severe in Thailand and Indonesia. It suggests that the ASEAN-4 countries should strengthen their financial systems and implement measures to prevent future crises.

7. The seventh part is the references section, which lists the sources used in the study. It includes books, journal articles, and reports from the IMF and the ASEAN Secretariat.

8. The eighth part is the appendix, which contains the data used in the study. It includes a table of GDP growth rates for the ASEAN-4 countries from 1990 to 1999.
